Re: Report on Production and
Business Performance and Capital
Construction Investment in 2026;
Objectives and Tasks for 2026

To: The General Meeting of Shareholders

Viet Tri Chemical Joint Stock Company hereby presents its report on production and business performance and capital construction investment in 2025, as well as its objectives and tasks for 2026, as follows:

I. Production and Business Performance and Capital Construction Investment in 2025

1. Advantages and challenges

1.1. Advantages:

In 2025, Vietnam's basic chemical industry continued to maintain a positive recovery momentum, building upon the growth drivers established in the first half of the year. A stable macroeconomic environment, favorable economic growth, controlled inflation, and stable interest rates provided a solid foundation for business operations. Key industries such as textiles and paper entered their peak production season to fulfill year-end orders, resulting in strong demand for essential chemical products, including caustic soda, sodium hypochlorite (Javen), and polyaluminium chloride (PAC).

In addition, the Government's continued acceleration of public investment disbursement, particularly for environmental protection and water supply infrastructure projects, generated additional demand for specialty chemicals. These factors contributed to strengthening the industry's growth momentum and supported the Company's business performance during the latter part of the year.

1.2. Challenges:

During 2025, the Company faced several challenges that affected its business performance. Aluminum powder prices increased by approximately 16% compared with the fourth quarter of 2024, while domestic supply remained

insufficient, resulting in higher production costs and operational imbalances between caustic soda and chlorine-based products.

The 4.8% increase in electricity prices from 10 May 2025 also placed significant pressure on production costs, as electricity accounts for a substantial proportion of the manufacturing cost of chemical products.

The commercial operation of the Vi-CHLORINE product increased depreciation and selling expenses, while weak demand from the aquaculture sector and intense market competition adversely affected product consumption.

In addition, the HCl market in Northern Vietnam approached saturation, requiring sales to more distant markets at lower margins. Competitive pressure also intensified due to increasing imports of caustic soda from China at competitive prices, forcing the Company to reduce selling prices in order to maintain market share, thereby negatively affecting revenue and profitability.

2. Operating results in 2025

- Industrial production value (at current prices): VND 1,422.4 billion, equivalent to 106.1% of the 2024 figure and 86.6% of the 2025 plan;

- Total revenue: VND 1,816.4 billion, equivalent to 112.4% of the 2024 figure and 99.4% of the 2025 plan;

- Profit before tax: VND 123.8 billion, equivalent to 116.8% of the 2024 figure and 121.4% of the 2025 plan.

3. Capital Construction Investment in 2025

In 2025, the Company implemented capital construction investment projects with a total value of VND 13.225 billion, achieving 98% of the investment plan approved by the General Meeting of Shareholders (VND 13.563 billion), including:

- A project carried forward from 2024: the investment in standalone equipment for the 17% PAC solution production reactor, with completed investment value of VND 12.815 billion;

- A new investment project: a Lamella sedimentation system for water treatment, with an investment value of VND 0.410 billion.

II. Strategic Solutions and Operational Targets for the 2026 Business Plan

1. Market outlook

In 2026, ongoing trade tensions among major economies and geopolitical conflicts are expected to continue affecting raw material prices, energy costs, logistics expenses, and the supply-demand balance of basic chemical products.

For liquid caustic soda, regional supply is expected to remain abundant while demand from major consuming industries grows slowly, resulting in continued pressure on selling prices and business performance.

The domestic HCl market is expected to become more competitive following the market entry of hydrochloric acid products from Lam Thao Superphosphate and Chemicals Joint Stock Company in May 2026, adding new supply and increasing pressure on market share and pricing.

In addition, increasingly stringent regulations on environmental protection, chemical safety, and precursor management will require continued investment in environmental management systems and safety monitoring, leading to higher operating costs.

In this context, the Company will continue to focus on improving operational efficiency, strengthening cost control, and proactively adapting to market developments to maintain its competitiveness and business performance.

2. Key business plan targets for 2026

- Industrial production value (at current prices): VND 1,650 billion;
- Total revenue : VND 2.100 billion;
- Net Revenue : VND 1,905 billion ;
- Profit before tax : VND 130 billion;
- Capital construction investment: VND 12.450 billion, comprising seven investment preparation items and no projects carried forward from 2025.

3. Implement plan

To ensure the successful delivery of the 2026 business plan, the Company will focus on the following core solutions:

- *First*, strengthen market analysis and forecasting activities, proactively adjust sales policies in a flexible manner for each market segment and customer group, and enhance pre-sales, sales, and after-sales services to retain existing customers and expand market share;

- *Second*, focus on market development for Vi-CHLORiNE, the Company's strategic product. Increasing the consumption of this product will not only improve business performance but also support the consumption and stabilize the selling prices of other chlorine-based products;

- *Third*, maintain the stable operation of production facilities through regular inspection and maintenance programs, while continuing to optimize

production costs, reduce raw material consumption, negotiate with suppliers to control input costs, and manage inventories efficiently;

- *Fourth*, continue improving labor and remuneration management and encourage technical innovation initiatives to enhance labor productivity and overall business efficiency.

III. Conclusion

In 2025, Viet Tri Chemical Joint Stock Company made significant efforts to overcome challenges and maintain growth in revenue and profitability amid a volatile business environment. To achieve its 2026 business targets, the Company will continue to implement the above-mentioned solutions in a coordinated manner, promote proactiveness, innovation, and internal solidarity, and strive for sustainable and efficient growth.
